1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Price on March 16, 2005.

The application has been amended as follows:

In the Claims:

Claim 29, line 4, after "feed material" insert --, -- after "and" insert --said cyclonic evaporator also including--; after "evaporator tubes" insert --for heat exchange,--

2. The following is an examiner's statement of reasons for allowance: The invention relates to a cyclonic evaporator apparatus for separating two or more components of a feed material prior to or simultaneously with at least partially vaporizing one of the components the cyclonic evaporator including a swirl generator portion for imparting a swirling motion to the feed material, and said cyclonic evaporator also including an evaporator portion having one or more evaporator tubes for heat exchange. The prior art fails to teach and/or suggest the specific combination of the swirl generator and the evaporator including a heat exchanger. The apparatus provides separation of two or more components of a feed material prior to or simultaneously with at least partially vaporizing one of the components while taking advantage of the different volatilities or different rates of vaporization using the in-line swirl generator assembly.
